■ The aim of the Conference

The conference will be a forum of scientific discussion on both theoretical and practical issues connected with the relationship between the concepts of sustainable development and knowledge-based economy. Political declaration implying that smart, sustainable and inclusive development shall be the developmental path of the European Union should be accompanied by scientific considerations, on the theoretical basis of the proposed policies and measures as well as on their practical functioning.

Proper shaping of development processes at each management level requires relevant theoretical and informational background as well as continuous monitoring and evaluation. The conference contributes to both of these processes. The key aspect will be the discussion on the process of creating sustainable knowledge-based economy in Central and Eastern European countries.

Significant part of the conference will be the session in honour of Prof. Bazyli Poskrobko on the occasion of his 75th birth anniversary.
